ECO CLUB ACTIVITIES 2018-2019

Eco club or **green club** is a voluntary group which promotes the participation of students in learning about, and improving their environment. A green **club** is a means by which students and youth can organize themselves to learn more and this issue, and also take action to improve their immediate environment.

Eco Clubs play an important role in creating environmental awareness amongst the future generation. .

The activities under the scheme include:

1. In our College we have an eco-club, which Motivate the students to keep their surroundings green and clean by undertaking plantation of trees.
2. Promote ethos of conservation of water by minimizing the use of water.
3. Sensitize the students to minimize the use of plastic bags, not to throw them in public places as they choke drains and sewers, cause water logging and provide breeding ground for mosquitoes.
4. Organize tree plantation programmes, awareness programmes regarding various environmental issues.
5. To help individuals and social groups acquire a set of values and feelings of concern for environment, and the motivation for actively participating in environmental improvement and protection.
