**(Accredited with 'B' Grade by NAAC)**  
**Affiliated to Alagappa University, Karaikudi**  
**Poovanthi**

**Programme Outcome**  
**Programme Specific Outcome**  
**Course Outcome**

## *Outcome Based Education*

Education for life is the upshot of every higher educational institution. The institution, being the pioneer in women education, deploys curricula which address the needs of the society and are in line with, and reflect the institutions objectives to empower women through quality education.

Being affiliated to Alagappa University, Karaikudi, the institution receives procedural supports like curriculum, blueprint, exam pattern and ranking system from the university.

Learning is made more students - centric by preparing an institutionalised programme outcome, programme specific outcomes and course outcomes. The university curriculum is delivered based on it.

Apart from the conventional courses of the parent university, the institution provides add-on certificate courses to enhance the competencies of the students. Also the institution encourages the students to pursue online courses offered through Swayam Portal.

## **Programme Outcomes (PO)**

### **Under Graduate (UG)**

#### **KNOWLEDGE**

PO 1: Well stranded acquaintance in chosen subjects.

PO 2: Updated knowledge related to the subjects.

#### **SKILLS**

PO 1: Attainment of cognitive skills.

PO 2: Attainment of Life Skills for Employment.

#### **ATTITUDE**

PO 1: Holistic Personality Development through self-sufficient and lifelong learning.

PO 2: Eco Sensitivity, inclusive culture, moral uprightness and social commitment.

### **Post Graduate (PG)**

#### **KNOWLEDGE**

PO 1: Acquirement of higher knowledge for higher studies and research.

PO 2: Unification of knowledge and critical thinking.

#### **SKILLS**

PO 1: Academic skills and life skills for contribution to nation building.

PO 2: Attainment of specialized skills for entrepreneurship/employability.

#### **ATTITUDE**

PO 1: Realization of professional ethics and human values.

PO 2: National Integration and Social Commitment to Society.

## **DEPARTMENT OF TAMIL**

### **UG PROGRAMME - B.A.,TAMIL**

#### **Programme specific outcomes**

- தமிழ் மொழியின் இலக்கிய இலக்கண வரம்புகளை உணர்த்தி, தமிழ் மொழியை இனிமையாக உச்சரிக்கவும், பிழையின்றி எழுதவும் கற்றுத் தருதல்.
- ஆசிரியப் பணி, பத்திரிக்கைப் பணி, தொல்பொருள், அலுவலகப் பணிக்களங்களுக்கு ஆயத்தப் படுத்துதல்

#### **COURSE OUTCOME**

| Sl No              | Part                      | Subject Name                     | Course Outcome  |

| 17. | Contemporary Critical Theories     | <ul style="list-style-type: none"><li>• To make students understand important critical theories given by the Critics of the 20th century.</li><li>• To expose students to recent critical theories.</li><li>• To reinforce the critical sensibility of students.</li></ul> |
| 18. | Project                            | <ul style="list-style-type: none"><li>• To help students prepare a Project of their own.</li><li>• To prepare students for Pre-Doctoral research.</li></ul>  |
| 19. | Literature : Feminist Perspectives | <ul style="list-style-type: none"><li>• To understand the Feminist ideas and perspectives from their writings.</li></ul>   |

## **DEPARTMENT OF MATHEMATICS**

### **UG PROGRAMME - B.Sc., MATHEMATICS**

#### **Programme specific outcomes**

- Enables the students, to develop a high-quality intellectual level, seeking to interpret various concepts in Mathematics.
- Develop students' skill in problem solving and in applying the mathematical knowledge acquired so that they will be able to function effectively and responsibly in their daily lives.
- Provide a systematic understanding of the concepts and theories of Mathematics and their application in the real world – to an advanced level, and enhance career prospects in a huge array of fields.
- Ability to become successful professionals by demonstrating logical and analytical thinking.

#### **COURSE OUTCOME**

| Sl No             | Part          | Subject Name                | Course Outcome   |
|-------------------|---------------|-----------------------------|--|
| <b>I SEMESTER</b> |               |                             |  |
| 1.                | I - Tamil     | தற்கால கவிதையும் உரைநடையும் | <ul style="list-style-type: none"><li>• கவிதைக் களங்களின் அழகியலை உணர்த்தி தமிழ் மொழியின் முக்கியத்துவத்தை அறியச் செய்தல்.</li></ul>   |
| 2.                | II - English  | English for Enrichment – I  | <ul style="list-style-type: none"><li>• Strengthen the students' basic reading of prose and poetry.</li><li>• Improve verbal communication skills.</li></ul>   |
| 3.                | III – Core I  | Calculus                    | <ul style="list-style-type: none"><li>• Understand the concept of differentiation and higher derivatives.</li><li>• Understand the meaning of the derivative in terms of a rate of change and local linear approximation.</li><li>• Familiarize themselves with the techniques of integration and differentiation of functions with real variables.</li></ul>  |
| 4.                | III – Core II | Algebra & Trigonometry      | <ul style="list-style-type: none"><li>• Attain the basic knowledge about equations and to solve equations in different Methods.</li><li>• Learn the concept of rational roots, irrational roots, imaginary roots and the relation between the roots and coefficient of the equations.</li><li>• Gain knowledge of nature of roots using theorems like Rolle's Theorem and Strum's theorem.</li></ul> |

**Program outcomes, program specific outcomes and course outcomes**

|                    |                            |  |  |
|--------------------|----------------------------|--|--|
| 5.                 | III – Allied - I           | Properties of Matter, Thermal Physics and Optics(Theory)     | <ul style="list-style-type: none"> <li>• Acquire knowledge about the different physical properties of each state of matter.</li> <li>• Understand the relation between heat and various forms of energy.</li> <li>• Understand the basic principles of optics.</li> </ul>  |
| 6.                 | III - Allied Practicals    | Allied General Physics Practicals                            | <ul style="list-style-type: none"> <li>• To train the students in various experiments in the field of Properties of matter, Electronics and Heat using the correct physical scientific frame work.</li> </ul>  |
| 7.                 | IV - Non Major Elective I  | Communicative English  | <ul style="list-style-type: none"> <li>• To enable each learner at the college level to communicate effectively in English both in the spoken and in the written mode.</li> </ul>  |
| <b>II SEMESTER</b> |                            |  |  |
| 8.                 | I - Tamil                  | இடைக்கால இலக்கியமும் சிறுகதையும்                             | <ul style="list-style-type: none"> <li>• பக்தி நெறிகளின் மேம்பாட்டினை உணர்த்தி, திருத்தலங்களை அறியச் செய்தல்.</li> </ul>   |
| 9.                 | II - English               | English For Enrichment – II                                  | <ul style="list-style-type: none"> <li>• Get acquainted with simple Prose and Poetry.</li> <li>• Have an appreciable understanding of English Grammar.</li> </ul>  |
| 10.                | III – Core III             | Analytical Geometry of 3D and Vector Calculus                | <ul style="list-style-type: none"> <li>• Enable the students to develop their skill in 3 dimensional Cartesian Co-ordinates system.</li> <li>• Learn the properties of straight lines and spheres.</li> <li>• Derive the conditions for parallelism and perpendicularity of two lines.</li> </ul>  |
| 11.                | III - Core IV              | Sequences and Series   | <ul style="list-style-type: none"> <li>• Understand a formal introduction to the concept of limit and compute the limits of sequences.</li> <li>• Gain knowledge of some simple techniques for testing the convergence of sequences.</li> <li>• Apply the properties of limits summarized in Theorems and recognize when a sequence is increasing, decreasing, bounded and monotonic.</li> </ul> |
| 12.                | III – Allied II            | Electricity, Electronics, Atomic and Nuclear Physics(Theory) | <ul style="list-style-type: none"> <li>• Understand the key role of electricity and electronics.</li> <li>• Understand the structure of the atom, the constituents of the nucleus, and the interactions of radiation with matter.</li> </ul>   |
| 13.                | III - Allied Practicals    | Allied General Physics Practicals                            | <ul style="list-style-type: none"> <li>• To train the students in various experiments in the field of Properties of matter, Electronics and Heat using the correct physical scientific frame work.</li> </ul>  |
| 14.                | IV – Environmental Studies | Environmental Studies  | <ul style="list-style-type: none"> <li>• Understand the breadth and interdisciplinary nature of environmental issues.</li> <li>• Formulate an action plan for sustainable alternatives that integrate science, humanist, and social perspectives.</li> </ul>   |

**Program outcomes, program specific outcomes and course outcomes**

| <b>III SEMESTER</b> |                            |   |   |
|---------------------|----------------------------|---|---|
| 15.                 | I - Tamil                  | காப்பியமும் புதினமும்                       | <ul style="list-style-type: none"> <li>புராண, தொன்மையான தொடர் நிலைச் செய்யுள்களின் வழி, வாழ்வியல் சிக்கல்களுக்குத் தீர்வு காட்டுதல்.</li> </ul>   |
| 16.                 | II - English               | English For Enrichment - III                | <ul style="list-style-type: none"> <li>Get acquainted with short stories in English and to make them enjoy and appreciate the pieces.</li> <li>Understand the salient features of One – Act Plays.</li> <li>Acquire proficiency in LSRW skills and communicate effectively.</li> </ul>  |
| 17.                 | III – Core V               | Abstract Algebra                            | <ul style="list-style-type: none"> <li>Learn the concepts and properties of various algebraic structures and Use results from elementary group theory to solve contemporary problems.</li> <li>Learn the elementary theorems and proof techniques of group and ring theory.</li> <li>Apply the theorems, proof techniques and standard computations of group and ring theory to solve problems.</li> </ul>  |
| 18.                 | III – Core VI              | Differential Equations and its Applications | <ul style="list-style-type: none"> <li>Understand some basic definitions and terminology associated with differential equations and their solutions.</li> <li>Identify a general method for constructing solutions to non-homogeneous linear constant coefficient second-order equations.</li> <li>Determine solutions to first order linear differential equations and second order linear homogeneous differential equations with constant coefficients.</li> </ul> |
| 19.                 | III – Allied III           | C Programming                               | <ul style="list-style-type: none"> <li>Illustrate the flowchart and design an algorithm for a given problem and to develop C programs using operators.</li> <li>Ability to work with textual information, characters and strings, arrays etc.</li> </ul>  |
| 20.                 | IV - Non Major Elective II | Effective Employability Skills              | <ul style="list-style-type: none"> <li>To train them in preparing the Curriculum Vitae and to face the interview.</li> </ul>  |
| 21.                 | IV- Skill Based Subject I  | Competitive Examination Skills              | <ul style="list-style-type: none"> <li>To build a sense of awareness among students through proper guidance about various competitive examinations in order to motivate students for prospective career in government and corporate sector.</li> <li>To intensively guide students for competitive examinations like TNPSC, UPSC, SSC, RRB, IBPS etc.</li> </ul>  |

**Program outcomes, program specific outcomes and course outcomes**

|                    |                             |                                  |  |
|--------------------|-----------------------------|----------------------------------|--|
| 22.                | V                           | Extension Activities             | <ul style="list-style-type: none"> <li>• Knowing the locational advantages and disadvantages.</li> <li>• Developing the social responsibility among the students.</li> </ul>   |
| <b>IV SEMESTER</b> |                             |                                  |  |
| 23.                | I - Tamil                   | பண்டை இலக்கியமும் நாடகமும்       | <ul style="list-style-type: none"> <li>• சங்க காலத் தமிழரின் பண்பாடு, கலாச்சாரங்களை அறியச் செய்தல்.</li> </ul>   |
| 24.                | II - English                | English For Enrichment - IV      | <ul style="list-style-type: none"> <li>• Apprehend a concise view of Shakespeare's plays.</li> <li>• Make the students' enhance their knowledge in grammar and its usages.</li> </ul>  |
| 25.                | III – Core VII              | Transform Techniques             | <ul style="list-style-type: none"> <li>• Introduce the concept of half range Fourier series.</li> <li>• Inculcate the knowledge of Laplace Transforms and the conditions for its existence.</li> <li>• Find the inverse Laplace Transform of certain functions by the method of partial fractions.</li> </ul>  |
| 26.                | III – Core VIII             | Linear Algebra                   | <ul style="list-style-type: none"> <li>• Present basic concepts of vector spaces.</li> <li>• Inculcate basic concepts of matrices and matrix algebra.</li> <li>• Learn about the span of a set and linear independence.</li> <li>• Able to find the change-of-basis matrix with respect to two bases of a vector space.</li> </ul>   |
| 27.                | III – Allied IV             | Internet and its Applications    | <ul style="list-style-type: none"> <li>• Introducing the concepts of internet.</li> <li>• To gain knowledge about basic internet usage.</li> </ul>   |
| 28.                | IV - Yoga                   | Manavalakalai Yoga               | <ul style="list-style-type: none"> <li>• To train and develop the physical body for leading a healthy life.</li> <li>• To rejuvenate the life energy, to retard the ageing process and to achieve spiritual development.</li> <li>• To offer meditation practices and introspection so as to strengthen the mind, increase its will power, concentration, creativity and receptivity and ultimately to transform the mind to achieve self realization.</li> <li>• To help every individual to realize the enduring values of peace, non-violence and harmony to revitalize human society for restoring its sanity and strength.</li> </ul> |
| 29.                | IV - Skill Based Subject II | Emergency and Medical Lab Skills | <ul style="list-style-type: none"> <li>• To recognize the nature and seriousness of the patient's condition or extent of Injuries to assess requirements for emergency medical care.</li> <li>• Administer appropriate emergency medical care based on assessment findings of the patient's condition.</li> <li>• To Perform safely and effectively the expectations of the job.</li> </ul>  |

**Program outcomes, program specific outcomes and course outcomes**

| <b>V SEMESTER</b> |                              |                         |  |
|-------------------|------------------------------|-------------------------|--|
| 30.               | III – Core IX                | Modern Analysis         | <ul style="list-style-type: none"> <li>• Develop a sound knowledge of the ideas and concepts related to metric spaces.</li> <li>• Understand proofs, counter arguments or counter examples in reals.</li> <li>• Learn the field axioms of the reals, covers, density, monotonicity, boundedness, Demonstrate completeness, limits, continuity.</li> </ul>  |
| 31.               | III - Core X                 | Mathematical Statistics | <ul style="list-style-type: none"> <li>• Gain the basic knowledge of measures of dispersion like mean, median and mode.</li> <li>• Obtain a point estimate for the variance and standard deviation of the conditional distribution and correlation and regression.</li> <li>• Learn the concepts and methods of probability and distribution theory.</li> <li>• Learn the applications of Binomial and Poisson distributions. Gain knowledge about the multivariate distributions.</li> </ul>  |
| 32.               | III – Core XI                | Statics                 | <ul style="list-style-type: none"> <li>• Able to construct free-body diagrams and to calculate the reactions necessary to ensure static equilibrium.</li> <li>• Understand the analysis of distributed loads.</li> <li>• Able to calculate centroids and moments of inertia.</li> </ul>  |
| 33.               | III – Core XII               | Linear Programming      | <ul style="list-style-type: none"> <li>• Understand and identify the need of using the Techniques in Operations Research.</li> <li>• Find optimum solution for real life problems using simplex techniques.</li> <li>• Gain the knowledge of transportation problem, sequencing problem and assignment method using many techniques.</li> </ul>  |
| 34.               | III – Elective I             | Graph Theory            | <ul style="list-style-type: none"> <li>• Understand the basic concepts of graphs.</li> <li>• Able to represent a graph by matrices.</li> <li>• Understand the properties of trees.</li> <li>• Understand Eulerian and Hamiltonian graphs.</li> <li>• Apply the Planarity Algorithm.</li> </ul>   |
| 35.               | IV - Skill Based Subject III | Heritage and Tourism    | <ul style="list-style-type: none"> <li>• To understand the definitions, terminology and concepts of cultural heritage and its relationships with tourism.</li> <li>• To Understand heritage tourism supply by examining different categories of heritage attractions and the contexts within which heritage exists and additional perspectives on scale from the supply perspective.</li> <li>• To understand the role of interpretation in cultural heritage sites and the relevance of such interpretation approaches to visitors.</li> <li>• Provide a framework to plan, design, and assess interpretation programs for tourists.</li> </ul> |

**Program outcomes, program specific outcomes and course outcomes**

|                    |                             |                                |  |
|--------------------|-----------------------------|--------------------------------|--|
| 36.                | IV - Skill Based Subject IV | Marketing and Sales Management | <ul style="list-style-type: none"> <li>To acquire analytical skills for solving marketing related problems and challenges and to familiar with the strategic marketing management process.</li> <li>To learn the elements of sales force to be an effective component of an organization's overall marketing strategy.</li> </ul>  |
| <b>VI SEMESTER</b> |                             |                                |  |
| 37.                | III – Core XIII             | Complex Analysis               | <ul style="list-style-type: none"> <li>Gain knowledge about the elementary transformation and bilinear transformation.</li> <li>Understand the significance of differentiability for complex functions and be familiar with the Cauchy-Riemann equations, Cauchy's Theorem, Compute the Taylor and Laurent expansions of simple functions, innermost Laurent Series at an isolated singularity and determine the residue.</li> <li>Use the Residue theorem to compute complex line integral and real integrals.</li> </ul> |
| 38.                | III – Core XIV              | Operations Research            | <ul style="list-style-type: none"> <li>Identify and develop operational research models from the verbal description of the real System.</li> <li>Able to design new simple models, like: CPM, PERT, Queueing model, Inventory model to improve decision –making and develops critical thinking and objective analysis of decision problems.</li> </ul>   |
| 39.                | III – Core XV               | Dynamics                       | <ul style="list-style-type: none"> <li>Able to solve problems on forces acting on moving particles.</li> <li>Gain knowledge of kinetic energy and momentum methods for particles and systems of particles.</li> <li>Acquire knowledge of the general principles of dynamics.</li> </ul>  |
| 40.                | III – Elective II           | Fuzzy Algebra                  | <ul style="list-style-type: none"> <li>Understand the fundamental concepts of fuzzy set.</li> <li>Understand the concept of <math>\alpha</math>-cut and its properties. Compute the fuzzy number using the arithmetic operations.</li> <li>Get the inference from conditional, quantified proposition.</li> </ul>  |
| 41.                | III – Elective III          | Numerical Analysis             | <ul style="list-style-type: none"> <li>Understand the method to solve system of linear equations, roots of non-linear equations.</li> <li>Learn the concept of interpolation.</li> <li>Able to approximate the functions and to estimate the errors.</li> <li>Use the numerical techniques to solve algebraic and differential equations.</li> </ul>   |

---

**Program outcomes, program specific outcomes and course outcomes**

---

|     |                             |                                      |  |
|-----|-----------------------------|--------------------------------------|--|
| 42. | IV - Skill Based Subject V  | Fruit, Vegetable Preservation Skills | <ul style="list-style-type: none"><li>• To understand the science, principles and techniques involved in fruits and vegetables preservation techniques.</li><li>• To impart thorough knowledge on the technical skills in various aspects of food processing and preservation.</li></ul> |
| 43. | IV - Skill Based Subject VI | Equipment Handling Skills for events | <ul style="list-style-type: none"><li>• To impart the characteristics of various types of electrical and electronic equipments used in events.</li><li>• To learn about the working, handling and troubleshooting skills on various electrical and electronic gadgets.</li></ul>         |

## **PG PROGRAMME- M.Sc.,Mathematics**

### **Programme Specific Outcome**

- Students can have the ability to write their own proof techniques for theorems, propositions with proper terminology and notations.
- To solve or approach complex problems in the field of Mathematics and they will apply the results to real life application problems.
- Students will provide specific examples of connections among various branches of Mathematics such as Algebra, Analysis and Differential Equations.
- With the acquired knowledge from the basics of Mathematics, students can be able to work or admit themselves to do research in the field of Applied Mathematics and also they will solve the problems that are facing in the industry and in real life situations. This will build a very good relationship between industry and Mathematicians.
- Enable the students to be well prepared for the CSIR-JRF examinations.

### **COURSE OUTCOME**

| Sl No | Course Name | Course Outcome  |
|-------|-------------|---|
| 1.    | Algebra- I  | <ul style="list-style-type: none"><li>• Understand the concepts of Groups, Normal subgroups and quotient groups.</li><li>• Explain the concepts of Homomorphism, Automorphism on groups and Permutation groups.</li><li>• Analyze basic concepts about Rings, Ideals and quotient rings.</li><li>• Demonstrate examples of Euclidean rings, Polynomial rings, Polynomial rings over Commutative rings.</li></ul>  |
| 2.    | Analysis-I  | <ul style="list-style-type: none"><li>• Define and recognize the basic properties of the field of real numbers. Improve and outline the logical thinking.</li><li>• Define and recognize the series of real numbers and convergence shown the ability of working independently and with groups. Define and recognize Bolzano- Weirstrass theorem. Ability to apply the theorem in a correct mathematical way.</li><li>• Comprehend rigorous arguments developing the theory underpinning real analysis.</li><li>• Demonstrate an understanding of limits and how they are used in sequences, series, differentiation and integration.</li><li>• Appreciate how abstract ideas and rigorous methods in mathematical analysis can be applied to important practical problems.</li></ul> |

---

---

**Program outcomes, program specific outcomes and course outcomes**

---

|    |                                 |  |
|----|---------------------------------|--|
| 3. | Differential Geometry           | <ul style="list-style-type: none"><li>• Understand the curvature and torsion of a space curve, how to compute them, and how they suffice to determine the shape of the curve.</li><li>• Understand the definition of a smooth surface, and the means by which many examples may be constructed.</li><li>• Understand the various different types of curvature associated to a surface, and how to compute them.</li><li>• Understand the first and second fundamental forms of a surface, how to compute them, and how they suffice to determine the local shape of the surface.</li><li>• Understand about Gaussian curvature, geodesics and its applications, how to compute them.</li><li>• Appreciate the distinction between intrinsic and extrinsic aspects of surface geometry.</li></ul> |
| 4. | Ordinary Differential Equations | <ul style="list-style-type: none"><li>• Apply the fundamental concepts of Ordinary Differential Equations and Partial Differential Equations and the basic numerical methods for their resolution.</li><li>• Solve the problems choosing the most suitable method.</li><li>• Understand the difficulty of solving problems analytically and the need to use Numerical approximations for their resolution and use computational tools to solve problems and applications of Ordinary Differential Equations and Partial Differential Equations.</li><li>• Formulate and solve differential equation problems in the field of Industrial Organization Engineering.</li><li>• Use an adequate scientific language to formulate the basic concepts of the course.</li></ul>                         |
| 5. | Number Theory                   | <ul style="list-style-type: none"><li>• Analyze and prove results presented in analytic number theory.</li><li>• Prove results similar to the ones presented in the course and apply the basic techniques, results and concepts of the course to concrete examples and exercises.</li><li>• Understand the interdisciplinary nature with other mathematical branches.</li><li>• Understand theoretical physics and Combinatorics with the knowledge of partition theory.</li></ul>   |
| 6. | Algebra - II                    | <ul style="list-style-type: none"><li>• Analyze and demonstrate examples of Linear independence and bases, Dual Spaces and Inner product spaces.</li><li>• Assess properties implied by Roots of Polynomials and more about Roots.</li><li>• Classify and determine the trace and transpose of the matrices.</li><li>• Define, illustrate and apply the concepts of unitary Hermitian and Normal transformation.</li></ul>   |

**Program outcomes, program specific outcomes and course outcomes**

|     |                                |   |
|-----|--------------------------------|---|
| 7.  | Analysis-II                    | <ul style="list-style-type: none"> <li>• Demonstrate understanding of the basic concepts underlying the definition of the general Lebesgue integral.</li> <li>• Prove basic results of measure theory and integration theory.</li> <li>• Demonstrate understanding of the statement and proof of the fundamental integral convergence theorems, and their applications.</li> <li>• Demonstrate understanding of the statements of the main results on integration on product spaces and an ability to apply these in examples and to apply the theory of the course to solve a variety of problems at an appropriate level of difficulty.</li> <li>• Demonstrate skills in communicating mathematics both orally and in writing.</li> </ul> |
| 8.  | Partial Differential Equations | <ul style="list-style-type: none"> <li>• Classify partial differential equations and transform into canonical form.</li> <li>• Solve linear partial differential equations of both first and second order.</li> </ul>   |
| 9.  | Mechanics                      | <ul style="list-style-type: none"> <li>• Have a deep understanding of Newton's laws.</li> <li>• Be able to solve the Newton equations for simple configurations using various method, Understand the foundations of chaotic motion.</li> </ul>  |
| 10. | Graph Theory                   | <ul style="list-style-type: none"> <li>• Understand the basic concepts of graphs, directed graphs, and weighted graphs and able to present a graph by matrices.</li> <li>• Understand the properties of trees and able to find a minimal spanning tree for a given weighted graph.</li> <li>• Understand Eulerian and Hamiltonian graphs.</li> </ul>  |
| 11. | Complex Analysis               | <ul style="list-style-type: none"> <li>• Extend the concepts of analysis of real variables to complex numbers likes sequences and series and differentiate and Integrate Complex functions.</li> <li>• Carry out contour Integration. Compute integrals using residues.</li> <li>• Apply techniques of Complex analysis to summation of series.</li> <li>• Apply conformal mappings to problems from physical sciences.</li> </ul>  |
| 12. | Topology - I                   | <ul style="list-style-type: none"> <li>• Define and illustrate the concept of topological spaces and continuous functions.</li> <li>• Define and illustrate the concept of product topology and quotient topology.</li> <li>• Prove a selection of theorems concerning topological spaces, continuous functions, product topologies, and quotient topologies. Define and illustrate the concepts of the separation axioms.</li> <li>• Define connectedness and compactness, and prove a selection of related theorems, and describe different examples distinguishing general, geometric, and algebraic topology.</li> </ul>  |

---

**Program outcomes, program specific outcomes and course outcomes**

---

|     |                            |  |
|-----|----------------------------|--|
| 13. | Probability and Statistics | <ul style="list-style-type: none"><li>• Basic probability axioms and rules and the moments of discrete and continuous random variables as well as be familiar with common named discrete and continuous random variables.</li><li>• How to derive the probability density function of transformations of random variables and use these techniques to generate data from various distributions.</li><li>• How to calculate probabilities, and derive the marginal and conditional distributions of bivariate random variables.</li><li>• Discrete time Markov chains and methods of finding the equilibrium probability distributions.</li></ul>   |
| 14. | Discrete Mathematics       | <ul style="list-style-type: none"><li>• To develop skills in the basic principles of Boolean algebra, Logic, Set theory, Permutations and combinations and Graph Theory.</li></ul>   |
| 15. | Fuzzy Mathematics          | <ul style="list-style-type: none"><li>• Gain knowledge about constructing the appropriate fuzzy numbers corresponding to uncertain and imprecise collected data.</li><li>• Gain knowledge about finding the optimal solution of mathematical programming problems having uncertain and imprecise data. Knowledge about fuzzy cluster analysis and how to solve basic problems using fuzzy cluster analysis.</li><li>• Distinguish between the crisp set and fuzzy set concepts through the learned differences between the crisp set characteristic function and the fuzzy set membership function.</li><li>• Draw a parallelism between crisp set operations and fuzzy set operations through the use of characteristic and membership functions respectively.</li><li>• Able to define fuzzy sets using linguistic words and represent these sets by membership functions.</li></ul> |
| 16. | Functional Analysis        | <ul style="list-style-type: none"><li>• Describe the properties of normed linear spaces and construct examples of such spaces.</li><li>• Extend basic notions from calculus to metric spaces and normed vector spaces.</li><li>• State and prove theorems about finite dimensionality in normed vectors spaces.</li><li>• State and prove the Cauchy-Swartz Inequality and apply it to the derivation of other inequalities.</li><li>• Prove that a given space is a Hilbert spaces or a Banach Spaces.</li><li>• Describe the dual of a normed linear space.</li></ul>  |
| 17. | Operations Research        | <ul style="list-style-type: none"><li>• Understand the theory of optimization methods and algorithms developed for solving various types of optimization problems formulate optimization problems and apply the concept of optimality criteria for various types of optimization problems.</li><li>• Solve various constrained and unconstrained problems in single variable as well as multivariable and apply the methods of optimization in real life situation and develop and promote research interest in applying optimization techniques in problems.</li></ul>  |

---

**Program outcomes, program specific outcomes and course outcomes**

|     |                    |   |
|-----|--------------------|---|
| 18. | Topology II        | <ul style="list-style-type: none"><li>• Define connectedness and compactness, and prove a selection of related theorems, and describe different examples distinguishing general, geometric, and algebraic topology.</li></ul>   |
| 19. | Numerical Analysis | <ul style="list-style-type: none"><li>• Demonstrate understanding of common Numerical methods and how they are used to obtain approximate solutions to otherwise intractable mathematical problems.</li><li>• Apply various mathematical operations and tasks, such as interpolation, differentiation, integration, the solutions of linear equations and the solutions of differential equations and partial differential equations.</li><li>• Solve dense systems of linear equations and least squares problems and have a working knowledge of LU and QR factorizations for these problems.</li><li>• Understand and apply appropriate techniques for numerical differentiation and integration.</li><li>• Solve initial value problem ordinary differential equations with explicit or implicit methods as appropriate solution.</li></ul> |

## DEPARTMENT OF PHYSICS

### UG PROGRAMME - B.Sc., PHYSICS

#### Programme Specific Outcomes

- Acquire conceptual and procedural knowledge relevant to Physics.
- Creates knowledge of the practical applications of physics to a wide variety of other fields.

#### COURSE OUTCOME

| Sl No             | Part           | Subject Name                   | Course Outcome   |
|-------------------|----------------|--------------------------------|--|
| <b>I SEMESTER</b> |                |                                |  |
| 1.                | I – Tamil      | தற்கால கவிதையும் உரைநடையும்    | • கவிதைக் களங்களின் அழகியலை உணர்த்தி தமிழ் மொழியின் முக்கியத்துவத்தை அறியச் செய்தல்.   |
| 2.                | II – English   | English For Enrichment – I     | • Strengthen the students' basic reading of prose and poetry.<br>• Improve verbal communication skills.  |
| 3.                | III – Core I   | Properties of Matter and sound | • Acquire knowledge about the different physical properties of each state of matter.<br>• Understand how sound is produced and propagated through a medium.  |
| 4.                | III – Core II  | Mechanics and Relativity       | • Understand the motion of macroscopic objects, hydrostatics and hydrodynamics and how matter and forces exist and interact.<br>• Understand the behaviour of objects in space and time.   |
| 5.                | III – Core III | General Physics Practical I    | • Train the students to interpret the findings on various activities in the field of electromagnetism, properties of matter and sound using the correct physical scientific framework.   |
| 6.                | III – Allied I | Ancillary Mathematics I        | • Understand and perform the matrix operations.<br>• Knowledge to interpret a function from an algebraic, numerical, graphical and verbal perspective.<br>• Solve a variety of trigonometric, inverse trigonometric equations and the derivative of a function at a point. |

**Program outcomes, program specific outcomes and course outcomes**

|                     |                            |   |  |
|---------------------|----------------------------|---|--|
| 7.                  | IV – Non Major Elective I  | Communicative English                       | <ul style="list-style-type: none"> <li>To enable each learner at the college level to communicate effectively in English both in the spoken and in the written mode.</li> </ul>  |
| <b>II SEMESTER</b>  |                            |   |  |
| 8.                  | I – Tamil                  | இடைக்கால இலக்கியமும் சிறுகதையும்            | <ul style="list-style-type: none"> <li>பக்தி நெறிகளின் மேம்பாட்டினை உணர்த்தி , திருத்தலங்களை அறியச் செய்தல்.</li> </ul>  |
| 9.                  | II – English               | English For Enrichment – II                 | <ul style="list-style-type: none"> <li>Get acquainted with simple Prose and Poetry.</li> <li>Have an appreciable understanding of English Grammar.</li> </ul>  |
| 10.                 | III – Core III             | General Physics Practical I                 | <ul style="list-style-type: none"> <li>Train the students to interpret the findings on various activities in the field of electromagnetism, properties of matter and sound using the correct physical scientific framework.</li> </ul>   |
| 11.                 | III – Core IV              | Thermal and statistical physics             | <ul style="list-style-type: none"> <li>To understand the relation between heat and various forms of energy.</li> <li>Enabling the students to find statistical solutions to movement of elementary particles.</li> </ul>   |
| 12.                 | III – Core V               | Electricity, Magnetism and Electromagnetism | <ul style="list-style-type: none"> <li>To understand the key role of electricity and electromagnetism.</li> </ul>  |
| 13.                 | III – Allied II            | Ancillary Mathematics II                    | <ul style="list-style-type: none"> <li>To understand the basic concepts of vector calculus.</li> <li>To understand the basics of transform techniques and statistical tools.</li> </ul>  |
| 14.                 | IV – Environmental Studies | Environmental Studies                       | <ul style="list-style-type: none"> <li>Understand the breadth and interdisciplinary nature of environmental issues.</li> <li>Formulate an action plan for sustainable alternatives that integrate science, humanist, and social perspectives.</li> </ul>                               |
| <b>III SEMESTER</b> |                            |   |  |
| 15.                 | I – Tamil                  | காப்பியமும் புதினமும்                       | <ul style="list-style-type: none"> <li>புராண, தொன்மையான தொடர் நிலைச் செய்யுள்களின் வழி, வாழ்வியல் சிக்கல்களுக்குத் தீர்வு காட்டுதல்.</li> </ul>  |
| 16.                 | II – English               | English For Enrichment – III                | <ul style="list-style-type: none"> <li>Get acquainted with short stories in English and to make them enjoy and appreciate the pieces.</li> <li>Understand the salient features of One – Act Plays.</li> <li>Acquire proficiency in LSRW skills and communicate effectively.</li> </ul> |
| 17.                 | III – Core VI              | Optics and Spectroscopy                     | <ul style="list-style-type: none"> <li>To understand the basic principles of optics and spectroscopy.</li> </ul>   |
| 18.                 | III – Core VII             | General Physics Practical II                | <ul style="list-style-type: none"> <li>To train the students in various experiments in the field of Optics, Magnetism and Heat using the correct physical scientific framework.</li> </ul>   |

**Program outcomes, program specific outcomes and course outcomes**

|                    |                             |                                  |   |
|--------------------|-----------------------------|----------------------------------|---|
| 19.                | III – Allied III            | Discrete Mathematics             | <ul style="list-style-type: none"> <li>• Making the students to realize and find that there are multiple solutions to a given problem.</li> <li>• Applying logical reasoning to solve a variety of problems.</li> </ul>   |
| 20.                | IV – Non Major Elective II  | Effective Employability Skills   | <ul style="list-style-type: none"> <li>• To train them in preparing the Curriculum Vitae and to face the interview.</li> </ul>  |
| 21.                | IV – Skill Based Subject I  | Competitive Examination Skills   | <ul style="list-style-type: none"> <li>• To build a sense of awareness among students through proper guidance about various competitive examinations in order to motivate students for prospective career in government and corporate sector.</li> <li>• To intensively guide students for competitive examinations like TNPSC, UPSC, SSC, RRB, IBPS etc.</li> </ul>                        |
| 22.                | V                           | Extension Activities             | <ul style="list-style-type: none"> <li>• Knowing the locational advantages and disadvantages.</li> <li>• Developing the social responsibility among the students.</li> </ul>  |
| <b>IV SEMESTER</b> |                             |                                  |   |
| 23.                | I – Tamil                   | பண்டை இலக்கியமும் நாடகமும்       | <ul style="list-style-type: none"> <li>• சங்க காலத் தமிழரின் பண்பாடு, கலாச்சாரங்களை அறியச் செய்தல்.</li> </ul>  |
| 24.                | II – English                | English For Enrichment – IV      | <ul style="list-style-type: none"> <li>• Apprehend a concise view of Shakespeare's plays.</li> <li>• Make the students' enhance their knowledge in grammar and its usages.</li> </ul>   |
| 25.                | III – Core VII              | General Physics Practical II     | <ul style="list-style-type: none"> <li>• To train the students in various experiments in the field of Optics, Magnetism and Heat using the correct physical scientific framework.</li> </ul>  |
| 26.                | III – Core VIII             | Atomic and Nuclear Physics       | <ul style="list-style-type: none"> <li>• Understand the structure of the atom, the constituents of the nucleus, and the interactions of radiation with matter.</li> </ul>   |
| 27.                | III – Allied IV             | Operations Research              | <ul style="list-style-type: none"> <li>• Enabling the students to formulate a physical situation into a Linear Programming Problem and solve using Simplex algorithms.</li> <li>• Understand the techniques of optimization for linear and non-linear problems.</li> </ul>  |
| 28.                | IV – Skill Based Subject II | Emergency And Medical Lab Skills | <ul style="list-style-type: none"> <li>• To recognize the nature and seriousness of the patient's condition or extent of Injuries to assess requirements for emergency medical care.</li> <li>• Administer appropriate emergency medical care based on assessment findings of the patient's condition.</li> <li>• To Perform safely and effectively the expectations of the job.</li> </ul> |

**Program outcomes, program specific outcomes and course outcomes**

|                   |                   |                                |  |
|-------------------|-------------------|--------------------------------|--|
| 29.               | IV – Yoga         | Manavalakalai Yoga             | <ul style="list-style-type: none"> <li>• To train and develop the physical body for leading a healthy life.</li> <li>• To rejuvenate the life energy, to retard the ageing process and to achieve spiritual development.</li> <li>• To offer meditation practices and introspection so as to strengthen the mind, increase its will power, concentration, creativity and receptivity and ultimately to transform the mind to achieve self realization.</li> <li>• To help every individual to realize the enduring values of peace, non-violence and harmony to revitalize human society for restoring its sanity and strength.</li> </ul> |
| <b>V SEMESTER</b> |                   |                                |  |
| 30.               | III – Core IX     | Analog Electronics             | <ul style="list-style-type: none"> <li>• Develop the ability to identify all electronic components and their working principle.</li> <li>• Develop the ability to analyse and design analog electronic circuits using discrete components.</li> </ul>  |
| 31.               | III – Core X      | Computer Programming in C      | <ul style="list-style-type: none"> <li>• Illustrate and design flowchart and algorithm for a given problem.</li> <li>• Ability to work with textual information, characters and strings, arrays etc.,</li> <li>• To train the students to develop C programs.</li> </ul>   |
| 32.               | III – Core XI     | General Physics Practical III  | <ul style="list-style-type: none"> <li>• To train the students in advanced experiments in the field of Optics, Magnetism and Heat using the correct physical scientific framework.</li> </ul>  |
| 33.               | III – Core XII    | Electronics Practical IV       | <ul style="list-style-type: none"> <li>• To train the students in various experiments in the field of Electronics using the correct physical scientific framework.</li> </ul>  |
| 34.               | III – Elective I  | Laser Physics and Fibre Optics | <ul style="list-style-type: none"> <li>• To understand fundamentals of laser operation and the basics of their practical implementation, principles of operations.</li> <li>• Knowing the basics of signal propagation through optical fibres.</li> </ul>  |
| 35.               | III – Elective II | Solid State Physics            | <ul style="list-style-type: none"> <li>• To understand the basic theory of structure, composition and physical properties of crystalline materials, different types of crystal binding and correlate the theoretical results with experimental data.</li> </ul>  |

**Program outcomes, program specific outcomes and course outcomes**

|                    |                              |   |  |
|--------------------|------------------------------|---|--|
| 36.                | IV – Skill Based Subject III | Heritage and Tourism                    | <ul style="list-style-type: none"> <li>To understand the definitions, terminology and concepts of cultural heritage and its relationships with tourism.</li> <li>To understand heritage tourism supply by examining different categories of heritage attractions and the contexts within which heritage exists and additional perspectives on scale from the supply perspective.</li> <li>To understand the role of interpretation in cultural heritage sites and the relevance of such interpretation approaches to visitors.</li> <li>Provide a framework to plan, design, and assess interpretation programs for tourists.</li> </ul> |
| 37.                | IV – Skill Based Subject IV  | Marketing and Sales Management          | <ul style="list-style-type: none"> <li>To acquire analytical skills for solving marketing related problems and challenges and to familiar with the strategic marketing management process.</li> <li>To learn the elements of sales force to be an effective component of an organization's overall marketing strategy.</li> </ul>  |
| <b>VI SEMESTER</b> |                              |   |  |
| 38.                | III – Core XI                | General Physics Practical III           | <ul style="list-style-type: none"> <li>To train the students in advanced experiments in the field of Optics, Magnetism and Heat using the correct physical scientific framework.</li> </ul>  |
| 39.                | III – Core XII               | Electronics Practical IV                | <ul style="list-style-type: none"> <li>To train the students in various experiments in the field of Electronics using the correct physical scientific framework.</li> </ul>  |
| 40.                | III – Core XIII              | Elements of Theoretical physics         | <ul style="list-style-type: none"> <li>Enabling the students to apply the mathematical models and abstraction of physical objects.</li> </ul>  |
| 41.                | III – Core XIV               | Digital electronics                     | <ul style="list-style-type: none"> <li>Make them to understand the mathematical logical by applying the electronics.</li> </ul>  |
| 42.                | III – Core XV                | Project                                 | <ul style="list-style-type: none"> <li>Students can be able to inculcate and show their physics knowledge in the innovative experiments.</li> </ul>  |
| 43.                | III – Elective III           | Fundamentals of Nano science            | <ul style="list-style-type: none"> <li>Students can be able to understand the fundamental principles of Nano science and Nanotechnology.</li> </ul>  |

**DEPARTMENT OF COMPUTER SCIENCE**

**UG PROGRAMME - B.Sc., COMPUTER SCIENCE**

**Programme Specific Outcome**

- Ability to apply knowledge of computing, mathematics, and basic sciences that may be relevant and appropriate to the domain.
- Ability to analyse a problem, identify and define the computing requirements, which may be appropriate to its solution.
- Understanding the professional, ethical, legal, security, social issues and responsibilities related to the computer field.
- Ability to use current technologies, skills, and computing tools.

**COURSE OUTCOME**

| Sl No              | Part                      | Subject Name                     | Course Outcome  |
|--------------------|---------------------------|----------------------------------|---|
| <b>I SEMESTER</b>  |                           |                                  |   |
| 1.                 | I - Tamil                 | தற்கால கவிதையும் உரைநடையும்      | <ul style="list-style-type: none"> <li>• கவிதைக் களங்களின் அழகியலை உணர்த்தி தமிழ் மொழியின் முக்கியத்துவத்தை அறியச் செய்தல்.</li> </ul>  |
| 2.                 | II - English              | English for enrichment - I       | <ul style="list-style-type: none"> <li>• Strengthen the students' basic reading of prose and poetry.</li> <li>• Improve verbal communication skills.</li> </ul>   |
| 3.                 | III – Core I              | Programming in C                 | <ul style="list-style-type: none"> <li>• Illustrate and design flowchart and algorithm for a given problem.</li> <li>• Ability to work with textual information, characters and strings, arrays etc., and to develop C programs.</li> </ul> |
| 4.                 | III – Core II             | Programming in C Lab             | <ul style="list-style-type: none"> <li>• Training to handle the common data structures typically found in C programs — namely arrays, strings, pointers, functions etc. and to handle possible errors during program execution.</li> </ul>  |
| 5.                 | III - Allied I            | Fundamentals of Computer         | <ul style="list-style-type: none"> <li>• Define and distinguish Hardware and Software components of computer system.</li> </ul>   |
| 6.                 | IV - Non Major Elective I | Communicative English            | <ul style="list-style-type: none"> <li>• To enable each learner at the college level to communicate effectively in English both in the spoken and in the written mode.</li> </ul>   |

| 14.                 | II – English               | Poetry, Drama & Communication Skills              | <ul style="list-style-type: none"> <li>• Get acquainted with short stories in English and to make them enjoy and appreciate the pieces.</li> <li>• Understand the salient features of One – Act Plays.</li> <li>• Acquire proficiency in LSRW skills and communicate effectively.</li> </ul> |
| 15.                 | III – Core V               | Java Programming                                  | <ul style="list-style-type: none"> <li>• Gain knowledge about basic Java language syntax and semantics to write Java programs and to understand the object oriented programming in JAVA.</li> </ul>  |
| 16.                 | III – Core VI              | Java Programming Lab                              | <ul style="list-style-type: none"> <li>• To provide sufficient training to develop projects with object oriented concepts.</li> </ul>  |
| 17.                 | III – Allied III           | Introduction to Information Technology            | <ul style="list-style-type: none"> <li>• To acquire the knowledge of evolution of computers and to learn the basic ethics in the field of information technology.</li> <li>• To emphasize the knowledge and skills associated with the basic of computer education.</li> </ul>               |

**Program outcomes, program specific outcomes and course outcomes**

|                    |                            |   |  |
|--------------------|----------------------------|---|--|
| 18.                | IV – Non Major Elective II | Effective Employability Skills              | <ul style="list-style-type: none"> <li>To train them in preparing the Curriculum Vitae and to face the interview.</li> </ul>   |
| 19.                | IV – Skill Based Subject I | Competitive Examination Skills              | <ul style="list-style-type: none"> <li>To build a sense of awareness among students through proper guidance about various competitive examinations in order to motivate students for prospective career in government and corporate sector.</li> <li>To intensively guide students for competitive examinations like TNPSC, UPSC, SSC, RRB, IBPS etc.</li> </ul>   |
| 20.                | V                          | Extension Activities                        | <ul style="list-style-type: none"> <li>Knowing the locational advantages and disadvantages.</li> <li>Developing the social responsibility among the students.</li> </ul>   |
| <b>IV SEMESTER</b> |                            |   |  |
| 21.                | I – Tamil                  | பண்டை இலக்கியமும் உரைநடையும்                | <ul style="list-style-type: none"> <li>சங்க காலத் தமிழரின் பண்பாடு, கலாச்சாரங்களை அறியச் செய்தல்.</li> </ul>   |
| 22.                | II – English               | Shakespeare & English for Competitive Exams | <ul style="list-style-type: none"> <li>Apprehend a concise view of Shakespeare's plays.</li> <li>Make the students' enhance their knowledge in grammar and its usages.</li> </ul>  |
| 23.                | III – Core VII             | Visual Basic                                | <ul style="list-style-type: none"> <li>To familiar with the fundamental principles of event-driven programming, recognize its advantages and be able to use the features of an integrated development environment.</li> </ul>  |
| 24.                | III – Core VIII            | Visual Basic Lab                            | <ul style="list-style-type: none"> <li>Training to understand and implement the event driven programming using VB.</li> <li>Training in creating a data base and retrieving the required data from the open source database using MYSQL.</li> </ul>  |
| 25.                | III – Allied IV            | Data Mining and Warehousing                 | <ul style="list-style-type: none"> <li>To understand the basic principles, concepts and applications of data mining.</li> <li>Have a good knowledge of the fundamental concepts that provide the foundation of data mining.</li> </ul>   |
| 26.                | IV – Yoga                  | Manavalakalai Yoga                          | <ul style="list-style-type: none"> <li>To train and develop the physical body for leading a healthy life.</li> <li>To rejuvenate the life energy, to retard the ageing process and to achieve spiritual development.</li> <li>To offer meditation practices and introspection so as to strengthen the mind, increase its will power, concentration, creativity and receptivity and ultimately to transform the mind to achieve self realization.</li> <li>To help every individual to realize the enduring values of peace, non-violence and harmony to revitalize human society for restoring its sanity and strength.</li> </ul> |

**Program outcomes, program specific outcomes and course outcomes**

|                   |                              |                                  |  |
|-------------------|------------------------------|----------------------------------|--|
| 27.               | IV – Skill Based Subject II  | Emergency And Medical Lab Skills | <ul style="list-style-type: none"> <li>To recognize the nature and seriousness of the patient's condition or extent of injuries to assess requirements for emergency medical care.</li> <li>Administer appropriate emergency medical care based on assessment findings of the patient's condition.</li> <li>To Perform safely and effectively the expectations of the job.</li> </ul>  |
| <b>V SEMESTER</b> |                              |                                  |  |
| 28.               | III – Core IX                | Operating System                 | <ul style="list-style-type: none"> <li>To learn the fundamentals of operating system and to gain knowledge on process management, CPU Scheduling, Memory Management, disk scheduling and file systems.</li> </ul>  |
| 29.               | III – Core X                 | Web Design Technology            | <ul style="list-style-type: none"> <li>Understand, analyze and apply the role of languages like HTML, CSS, XML, and JavaScript to create a web page.</li> </ul>  |
| 30.               | III – Core XI                | Web Design Lab                   | <ul style="list-style-type: none"> <li>Create a static website using HTML and add dynamic functionality to it by using Java Script.</li> <li>To create dynamic website on real world problems.</li> </ul>  |
| 31.               | III – Elective I             | Computer Graphics                | <ul style="list-style-type: none"> <li>To introduce the use of a components of the graphics system.</li> <li>To become familiar with building approach of graphics system components and algorithms related with them.</li> </ul>  |
| 32.               | III – Elective II            | Database Management System       | <ul style="list-style-type: none"> <li>Enabling the students to understand the designing and implementation of a database for a given problem and to organize, maintain and retrieve information from a database efficiently and effectively.</li> </ul>   |
| 33.               | IV – Skill Based Subject III | Heritage and Tourism             | <ul style="list-style-type: none"> <li>To understand the definitions, terminology and concepts of cultural heritage and its relationships with tourism.</li> <li>To understand heritage tourism supply by examining different categories of heritage attractions and the contexts within which heritage exists and additional perspectives on scale from the supply perspective.</li> <li>To understand the role of interpretation in cultural heritage sites and the relevance of such interpretation approaches to visitors.</li> <li>Provide a framework to plan, design, and assess interpretation programs for tourists.</li> </ul> |

**Program outcomes, program specific outcomes and course outcomes**

|                    |                             |  |   |
|--------------------|-----------------------------|--|---|
| 34.                | IV – Skill Based Subject IV | Marketing and Sales Management           | <ul style="list-style-type: none"> <li>To acquire analytical skills for solving marketing related problems and challenges and to familiar with the strategic marketing management process.</li> <li>To learn the elements of sales force to be an effective component of an organization's overall marketing strategy.</li> </ul> |
| <b>VI SEMESTER</b> |                             |  |   |
| 35.                | III – Core XII              | .Net Programming                         | <ul style="list-style-type: none"> <li>To understand Event-driven programming and window application in the integrated development environment.</li> </ul>  |
| 36.                | III – Core XIII             | Software Engineering                     | <ul style="list-style-type: none"> <li>To understand the techniques in Analysing, Designing, Implementing, Testing and maintaining a software product.</li> </ul>   |
| 37.                | III – Core XIV              | Computer Networks                        | <ul style="list-style-type: none"> <li>To understand the basic concepts of networking and identify the different types of networks.</li> <li>To be familiar with contemporary issues in networking technologies.</li> </ul>   |
| 38.                | III – Core XV               | .Net Programming Lab                     | <ul style="list-style-type: none"> <li>Training to understand and implement the event driven programming and providing a solution using VB.NET.</li> </ul>  |
| 39.                | III – Elective III          | Client/Server Computing                  | <ul style="list-style-type: none"> <li>To understand a client/server network and describe how the hardware and software are combined to implement client/server computing.</li> <li>To be familiar with the concepts of client and server software.</li> </ul>  |
| 40.                | IV – Skill Based Subject V  | Basic Internet and Office Automation Lab | <ul style="list-style-type: none"> <li>To perform documentation, accounting operations and presentation skills.</li> <li>To gain knowledge about basic internet usage.</li> </ul>   |
| 41.                | IV – Skill Based Subject VI | Fruit and Vegetable Preservation Skills  | <ul style="list-style-type: none"> <li>To understand the science, principles and techniques involved in fruits and vegetables preservation techniques.</li> <li>To impart thorough knowledge on the technical skills in various aspects of food processing and preservation.</li> </ul>   |

## **PG PROGRAMME - M.Sc.,(COMPUTER SCIENCE & INFORMATION TECHNOLOGY)**

### **Programme Specific Outcomes:**

- The M.Sc Computer Science is a two year programme offering subjects (courses) in curriculum to cover the Net/Set Examinations Syllabus.
- The objective of the programme is to brush up the student's algorithmic knowledge which is core needs of the any programme.
- This programme helps students to go to job with PG degree.
- Upon successful completion of the programme, students can find lucrative career opportunities in Software and Computer hardware related industry.
- In the end semester, a student completes a six month project to earn software development skill.

### **COURSE OUTCOME**

| Sl No | Course Name                          | Course Outcome   |
|-------|--------------------------------------|--|
| 1.    | Principles of Information Technology | <ul style="list-style-type: none"><li>• To acquire the knowledge of evolution of computers and to learn the basic ethics in the field of information technology.</li><li>• To emphasize the knowledge and skills associated with the basic of computer education.</li><li>• To enhance reading, writing, computing, communication and reasoning skills and apply them to the information technology environment.</li></ul> |
| 2.    | Programming in C                     | <ul style="list-style-type: none"><li>• To provide complete knowledge of C language.</li><li>• Able to develop logics which will help them to create applications in C. Also by learning the programming constructs they can easily switch over to any other language in future.</li></ul>   |
| 3.    | Data Structures & Algorithms         | <ul style="list-style-type: none"><li>• Creating Better Model of Data Structures for Design Paradigms to Analyze the Performance of Algorithms yielding good Software Product.</li><li>• Students are able to comprehend and select algorithm design approaches in a problem specific manner.</li></ul>  |
| 4.    | Computer Fundamentals & Architecture | <ul style="list-style-type: none"><li>• The computer architecture concepts like Instruction Level Parallelism, Multiprocessor and thread level parallelism, memory hierarchy design and storage systems were explored.</li></ul>   |
| 5.    | Programming in C Lab                 | <ul style="list-style-type: none"><li>• To provide exposure to problem-solving through programming.</li><li>• To give the student hands-on experience with the concepts.</li></ul>   |

---

**Program outcomes, program specific outcomes and course outcomes**

---

|     |   |   |
|-----|---|---|
| 6.  | <b>Operating Systems</b>                          | <ul style="list-style-type: none"><li>• Students will understand the operating system components and its services.</li><li>• Study and implement the algorithms in Process management, Memory management and File systems.</li></ul>  |
| 7.  | <b>Data Base Technology</b>                       | <ul style="list-style-type: none"><li>• Students will learn about the Database models, Application of Database models and Emerging Trends. Analyze database requirements and determine the entities involved in the system and their relationship to one another.</li></ul>   |
| 8.  | <b>Java Programming</b>                           | <ul style="list-style-type: none"><li>• Skill to design the applications of Java and applets for World Wide Web. Students from this course Learn basics of internet, Programming Internet and managing files.</li></ul>   |
| 9.  | <b>Computer Networks</b>                          | <ul style="list-style-type: none"><li>• Students will understand the working principles of various application protocols.</li><li>• Acquire knowledge about security issues and services available.</li></ul>   |
| 10. | <b>Java Programming Lab</b>                       | <ul style="list-style-type: none"><li>• To provide sufficient training to develop projects with object oriented concepts.</li></ul>   |
| 11. | <b>Resource Management Techniques</b>             | <ul style="list-style-type: none"><li>• Understand the theory of optimization methods and algorithms developed for solving various types of optimization problems formulate optimization problems and apply the concept of optimality criteria for various types of optimization problems.</li><li>• Solve various constrained and unconstrained problems in single variable as well as multivariable and apply the methods of optimization in real life situation and develop and promote research interest in applying optimization techniques in problems.</li></ul> |
| 12. | <b>Fundamentals of Grid &amp; Cloud Computing</b> | <ul style="list-style-type: none"><li>• Student possesses Knowledge of Parallel Computing and Utilization of Shared resources.</li><li>• Develop and deploy cloud application using popular cloud platforms. Design and develop highly scalable cloud- based applications by creating and configuring virtual machines on the cloud and building private cloud.</li></ul>   |
| 13. | <b>Principles of Compiler Design</b>              | <ul style="list-style-type: none"><li>• Specification of languages and its relation to automata, lexical analysis, finite state machines, context free languages, LL and LR parsing methods, syntax directed translation, error recovery, code generation, and portability.</li><li>• Ability to develop a large, complex, but well-structured software system that implements various phases of a compiler such as the scanner, parser, code generator, and optimizer.</li></ul>   |
| 14. | <b>Software Engineering</b>                       | <ul style="list-style-type: none"><li>• Students will understand the problem domain for developing various models of software Engineering.</li><li>• They are able to measure the product and process performance using various metrics and evaluate a system using various testing techniques and strategies.</li></ul>  |

---

**Program outcomes, program specific outcomes and course outcomes**

---

|     |                             |   |
|-----|-----------------------------|---|
| 15. | Visual Programming          | <ul style="list-style-type: none"><li>• Students will the concepts and design the solution to a problem using VB. Net.</li><li>• They also understand and implement the features of .Net for providing programmed solutions to complex problems.</li></ul>  |
| 16. | Visual Programming Lab      | <ul style="list-style-type: none"><li>• Training to understand and implement the event driven programming and providing a solution using VB.NET, C# and ASP.NET.</li><li>• Create applications that use ADO. NET.</li></ul>   |
| 17. | Web Technology              | <ul style="list-style-type: none"><li>• Students will explore markup languages features and create interactive web pages using them.</li><li>• They will also learn and design Client side validation using scripting languages and acquire knowledge about Open source JavaScript libraries.</li></ul>   |
| 18. | Data Mining and Warehousing | <ul style="list-style-type: none"><li>• Functionality of various data mining and data warehousing components.</li><li>• Compare different approaches of data ware housing and data mining with various technologies.</li><li>• Learn Design of Data Store of Warehousing, Retrieving and Mining Information of Warehouse.</li></ul>   |
| 19. | Project Work                | <ul style="list-style-type: none"><li>• Students will undertake a small project, under supervision, that in area of computing of mutual interest to the student. After successful completion able to identify, analyze, formulate and handle programming projects with a comprehensive and systematic approach and contribute as an individual or in a team in development of technical projects.</li></ul> |

## **DEPARTMENT OF INFORMATION TECHNOLOGY**

### **UG PROGRAMME - B.Sc.,(INFORMATION TECHNOLOGY)**

#### **Programme Specific Outcomes**

- To equip students with cutting-edge skills in the field of technologies to face challenges of modern computing industry, in order to make them technically greater and ethically strong with bright future.
- To shape the students into novel and high quality IT professionals to meet the global challenges.

#### **COURSE OUTCOME**

| Sl No              | Part                      | Subject Name                         | Course Outcome  |
|--------------------|---------------------------|--------------------------------------|---|
| <b>I SEMESTER</b>  |                           |                                      |   |
| 1.                 | I - Tamil                 | தற்கால கவிதையும் உரைநடையும்          | <ul style="list-style-type: none"> <li>• கவிதைக் களங்களின் அழகியலை உணர்த்தி தமிழ் மொழியின் முக்கியத்துவத்தை அறியச் செய்தல்.</li> </ul>  |
| 2.                 | II-English                | English for Enrichment – I           | <ul style="list-style-type: none"> <li>• Strengthen the students' basic reading of prose and poetry.</li> <li>• Improve verbal communication skills.</li> </ul>   |
| 3.                 | III - Core I              | Principles of Information Technology | <ul style="list-style-type: none"> <li>• To acquire the knowledge of evolution of computers and to learn the basic ethics in the field of information technology.</li> </ul>  |
| 4.                 | III - Core II             | Office Automation Lab                | <ul style="list-style-type: none"> <li>• To train in document creation and presentation.</li> </ul>   |
| 5.                 | III - Allied I            | Fundamentals of computer             | <ul style="list-style-type: none"> <li>• Define and distinguish Hardware and Software components of computer system.</li> </ul>   |
| 6.                 | IV - Non Major Elective I | Communicative English                | <ul style="list-style-type: none"> <li>• To enable each learner at the college level to communicate effectively in English both in the spoken and in the written mode.</li> </ul>   |
| <b>II SEMESTER</b> |                           |                                      |   |
| 7.                 | I - Tamil                 | இடைக்கால இலக்கியமும் சிறுகதையும்     | <ul style="list-style-type: none"> <li>• பக்தி நெறிகளின் மேம்பாட்டினை உணர்த்தி, திருத்தலங்களை அறியச்செய்தல்.</li> </ul>   |
| 8.                 | II-English                | English For Enrichment – II          | <ul style="list-style-type: none"> <li>• Get acquainted with simple Prose and Poetry.</li> <li>• Have an appreciable understanding of English Grammar.</li> </ul>   |
| 9.                 | III-Core III              | Programming in C and Data Structures | <ul style="list-style-type: none"> <li>• Illustrate and design flowchart and algorithm for a given problem.</li> <li>• Ability to work with textual information, characters and strings, arrays etc. and to develop C programs with the help of fundamental data structures.</li> </ul> |

**Program outcomes, program specific outcomes and course outcomes**

|                     |                           |                                |  |
|---------------------|---------------------------|--------------------------------|--|
| 10.                 | III- Core IV              | Data Structures using C Lab    | <ul style="list-style-type: none"> <li>To train in procedural programming skills using C and implementing data structures with C.</li> </ul>   |
| 11.                 | III-Allied II             | Desktop Publishing             | <ul style="list-style-type: none"> <li>Enhancing their creative skills for effective publications such as Advertisements, Flyers and Reports through Photoshop and Coreldraw.</li> </ul>   |
| 12.                 | IV- Environmental Studies | Environmental Studies          | <ul style="list-style-type: none"> <li>Understand the breadth and interdisciplinary nature of environmental issues.</li> <li>Formulate an action plan for sustainable alternatives that integrate science, humanist, and social perspectives.</li> </ul>   |
| <b>III SEMESTER</b> |                           |                                |  |
| 13.                 | I - Tamil                 | காப்பியமும் புதினமும்          | <ul style="list-style-type: none"> <li>புராண, தொன்மையான தொடர் நிலைச் செய்யுள்களின் வழி, வாழ்வியல் சிக்கல்களுக்குத் தீர்வு காட்டுதல்.</li> </ul>  |
| 14.                 | II - English              | English For Enrichment - III   | <ul style="list-style-type: none"> <li>Get acquainted with short stories in English and to make them enjoy and appreciate the pieces.</li> <li>Understand the salient features of One – Act Plays.</li> <li>Acquire proficiency in LSRW skills and communicate effectively.</li> </ul>   |
| 15.                 | III- Core V               | Java Programming               | <ul style="list-style-type: none"> <li>Gain knowledge about basic Java language syntax and semantics to write Java programs and to understand the object oriented programming in JAVA.</li> </ul>  |
| 16.                 | III- Core VI              | Java Programming Lab           | <ul style="list-style-type: none"> <li>To provide sufficient training to develop projects with object oriented concepts.</li> </ul>  |
| 17.                 | III- Allied III           | Ancillary Mathematics III      | <ul style="list-style-type: none"> <li>To understand the basic concepts of Differential equations, Laplace transformation and Numerical differentiation and integration.</li> </ul>  |
| 18.                 | IV- Non Major Elective II | Effective Employability Skills | <ul style="list-style-type: none"> <li>To train them in preparing the Curriculum Vitae and to face the interview.</li> </ul>   |
| 19.                 | IV- Skill Based Subject I | Competitive Examination Skills | <ul style="list-style-type: none"> <li>To build a sense of awareness among students through proper guidance about various competitive examinations in order to motivate students for prospective career in government and corporate sector.</li> <li>To intensively guide students for competitive examinations like TNPSC, UPSC, SSC, RRB, IBPS etc.</li> </ul> |
| 20.                 | V                         | Extension Activities           | <ul style="list-style-type: none"> <li>Knowing the locational advantages and disadvantages.</li> <li>Developing the social responsibility among the students.</li> </ul>   |

**Program outcomes, program specific outcomes and course outcomes**

| <b>IV SEMESTER</b> |                            |   |  |
|--------------------|----------------------------|---|--|
| 21.                | I - Tamil                  | பண்டை இலக்கியமும் நாகமும்                             | <ul style="list-style-type: none"> <li>சங்க காலத் தமிழரின் பண்பாடு, கலாச்சாரங்களை அறியச் செய்தல்.</li> </ul>   |
| 22.                | II- English                | English For Enrichment - IV                           | <ul style="list-style-type: none"> <li>Apprehend a concise view of Shakespeare's plays.</li> <li>Make the students' enhance their knowledge in grammar and its usages.</li> </ul>  |
| 23.                | III - Core VII             | Open source Software                                  | <ul style="list-style-type: none"> <li>To understand a basic idea of Open source technology and software development with the help of open source software like PHP, Python, PERL, MYSQL etc.,</li> </ul>  |
| 24.                | III - Core VIII            | Open Source Lab                                       | <ul style="list-style-type: none"> <li>To train in developing applications using open source software.</li> </ul>  |
| 25.                | III- Allied IV             | Optimization Techniques                               | <ul style="list-style-type: none"> <li>Enabling the students to formulate a physical situation into a Linear Programming Problem and solve using Simplex algorithms.</li> <li>Understand the techniques of optimization for linear and non-linear problems.</li> </ul>   |
| 26.                | IV- Yoga                   | Manavalakalai Yoga                                    | <ul style="list-style-type: none"> <li>To train and develop the physical body for leading a healthy life.</li> <li>To rejuvenate the life energy, to retard the ageing process and to achieve spiritual development.</li> <li>To offer meditation practices and introspection so as to strengthen the mind, increase its will power, concentration, creativity and receptivity and ultimately to transform the mind to achieve self realization.</li> <li>To help every individual to realize the enduring values of peace, non-violence and harmony to revitalize human society for restoring its sanity and strength.</li> </ul> |
| 27.                | IV -Skill Based Subject II | Skill Based Subject- Emergency And Medical Lab Skills | <ul style="list-style-type: none"> <li>To recognize the nature and seriousness of the patient's condition or extent of injuries to assess requirements for emergency medical care.</li> <li>Administer appropriate emergency medical care based on assessment findings of the patient's condition.</li> <li>To Perform safely and effectively the expectations of the job.</li> </ul>  |
| <b>V SEMESTER</b>  |                            |   |  |
| 28.                | III- Core IX               | Database Management Systems                           | <ul style="list-style-type: none"> <li>Enabling the students to understand the designing and implementation of a database for a given problem and to organize, maintain and retrieve information from a database efficiently and effectively.</li> </ul>   |

**Program outcomes, program specific outcomes and course outcomes**

|                    |                             |                                |  |
|--------------------|-----------------------------|--------------------------------|--|
| 29.                | III- Core X                 | Visual Basic and MySQL Lab     | <ul style="list-style-type: none"> <li>• Training to understand and implement the event driven programming using VB.</li> <li>• Training in creating a data base and retrieving the required data from the open source database using MYSQL.</li> </ul>  |
| 30.                | III- Core XI                | Visual Programming             | <ul style="list-style-type: none"> <li>• To familiar with the fundamental principles of event-driven programming, recognize its advantages and be able to use the features of an integrated development environment.</li> </ul>  |
| 31.                | III- Elective I             | Graphics and Multimedia        | <ul style="list-style-type: none"> <li>• To introduce the use of a components of the graphics system.</li> <li>• To understand the concepts of multimedia Technology.</li> </ul>   |
| 32.                | III- Elective II            | Computer Networks              | <ul style="list-style-type: none"> <li>• To understand the basic concepts of networking and identify the different types of networks.</li> <li>• To be familiar with contemporary issues in networking technologies.</li> </ul>  |
| 33.                | IV- Skill Based Subject III | Heritage And Tourism           | <ul style="list-style-type: none"> <li>• To understand the definitions, terminology and concepts of cultural heritage and its relationships with tourism.</li> <li>• To understand heritage tourism supply by examining different categories of heritage attractions and the contexts within which heritage exists and additional perspectives on scale from the supply perspective.</li> <li>• To understand the role of interpretation in cultural heritage sites and the relevance of such interpretation approaches to visitors.</li> <li>• Provide a framework to plan, design, and assess interpretation programs for tourists.</li> </ul> |
| 34.                | IV- Skill Based Subject IV  | Marketing and Sales Management | <ul style="list-style-type: none"> <li>• To acquire analytical skills for solving marketing related problems and challenges and to familiar with the strategic marketing management process.</li> <li>• To learn the elements of sales force to be an effective component of an organization's overall marketing strategy.</li> </ul>  |
| <b>VI SEMESTER</b> |                             |                                |  |
| 35.                | III- Core XII               | Software Engineering           | <ul style="list-style-type: none"> <li>• To understand the techniques in Analysing, Designing, Implementing, Testing and maintaining a software product.</li> </ul>  |
| 36.                | III- Core XIII              | Cloud Computing                | <ul style="list-style-type: none"> <li>• To understand the concepts and importance of cloud computing.</li> </ul>  |
| 37.                | III -Core XIV               | Web Programming                | <ul style="list-style-type: none"> <li>• Understand, analyze and apply the role of languages like HTML, CSS, XML, and JavaScript to create a web page.</li> </ul>  |

To present technical report by applying different visualization tools and Evaluation metrics.</li></ul>  |
| 39. | III -Elective III          | Mobile Communication                    | <ul style="list-style-type: none"><li>• To understand the basic concepts of wireless networks and generations of mobile communications.</li></ul>  |
| 40. | IV- Skill Based Subject V  | Fruit and Vegetable Preservation Skills | <ul style="list-style-type: none"><li>• To understand the science, principles and techniques involved in fruits and vegetables preservation techniques.</li><li>• To impart thorough knowledge on the technical skills in various aspects of food processing and preservation.</li></ul> |
| 41. | IV- Skill Based Subject VI | Equipment Handling Skills for Events    | <ul style="list-style-type: none"><li>• To impart the characteristics of various types of electrical and electronic equipments used in events.</li><li>• To learn about the working, handling and troubleshooting skills on various electrical and electronic gadgets.</li></ul>         |

## **UG PROGRAMME - B.C.A.,**

### **Programme Specific Outcomes**

- To evolve the Students to understand, gain knowledge in computing technologies. To nurture them to understand the latest trends in technology. To pursue their career in corporate sector or IT sector.
- Prepare the students to work professionally pertaining to ethics of Computer Application.
- The program aims to educate students in Computer Application with emphasis on hands-on practical training in software development.

### **COURSE OUTCOME**

| Sl No              | Part                     | Subject Name                     | Course Outcome  |
|--------------------|--------------------------|----------------------------------|---|
| <b>I SEMESTER</b>  |                          |                                  |   |
| 1.                 | I - Tamil                | தற்கால கவிதையும் உரைநடையும்      | <ul style="list-style-type: none"> <li>• கவிதைக் களங்களின் அழகியலை உணர்த்தி தமிழ் மொழியின் முக்கியத்துவத்தை அறியச் செய்தல்.</li> </ul>  |
| 2.                 | II-English               | English for Enrichment – I       | <ul style="list-style-type: none"> <li>• Strengthen the students' basic reading of prose and poetry.</li> <li>• Improve verbal communication skills.</li> </ul>   |
| 3.                 | III- Core I              | C and Data Structure             | <ul style="list-style-type: none"> <li>• Illustrate and design flowchart and algorithm for a given problem.</li> <li>• Ability to work with textual information, characters and strings, arrays etc. and to develop C programs with the help of fundamental data structures.</li> </ul> |
| 4.                 | III -Core II             | C and Data Structure Lab         | <ul style="list-style-type: none"> <li>• To train in procedural programming skills using C and implementing data structures with C.</li> </ul>  |
| 5.                 | III -Allied I            | Fundamentals of computer         | <ul style="list-style-type: none"> <li>• Define and distinguish Hardware and Software components of computer system.</li> </ul>   |
| 6.                 | IV- Non Major Elective I | Communicative English            | <ul style="list-style-type: none"> <li>• To enable each learner at the college level to communicate effectively in English both in the spoken and in the written mode.</li> </ul>   |
| <b>II SEMESTER</b> |                          |                                  |   |
| 7.                 | I - Tamil                | இடைக்கால இலக்கியமும் சிறுகதையும் | <ul style="list-style-type: none"> <li>• பக்தி நெறிகளின் மேம்பாட்டினை உணர்த்தி, திருத்தலங்களை அறியச் செய்தல்.</li> </ul>  |

**Program outcomes, program specific outcomes and course outcomes**

|     |                           |                             |  |
|-----|---------------------------|-----------------------------|--|
| 8.  | II-English                | English for Enrichment – II | <ul style="list-style-type: none"> <li>• Get acquainted with simple Prose and Poetry.</li> <li>• Have an appreciable understanding of English Grammar.</li> </ul>  |
| 9.  | III- Core III             | Programming in C++          | <ul style="list-style-type: none"> <li>• To develop an in-depth understanding of functional, logic, and object-oriented programming paradigms.</li> </ul>  |
| 10. | III- Core IV              | Programming in C++ Lab      | <ul style="list-style-type: none"> <li>• To train the object oriented concepts for implementation.</li> </ul>  |
| 11. | III -Allied II            | Desktop Publishing          | <ul style="list-style-type: none"> <li>• Enhancing their creative skills for effective publications such as Advertisements, Flyers and Reports through Photoshop and Coreldraw.</li> </ul>   |
| 12. | IV- Environmental Studies | Environmental Studies       | <ul style="list-style-type: none"> <li>• Understand the breadth and interdisciplinary nature of environmental issues.</li> <li>• Formulate an action plan for sustainable alternatives that integrate science, humanist, and social perspectives.</li> </ul> |

**III SEMESTER**

|     |                 |                              |  |
|-----|-----------------|------------------------------|--|
| 13. | I - Tamil       | காப்பியமும் புதினமும்        | <ul style="list-style-type: none"> <li>• புராண, தொன்மையான தொடர் நிலைச் செய்யுள்களின் வழி, வாழ்வியல் சிக்கல்களுக்குத் தீர்வு காட்டுதல்.</li> </ul>  |
| 14. | II-English      | English for Enrichment - III | <ul style="list-style-type: none"> <li>• Get acquainted with short stories in English and to make them enjoy and appreciate the pieces.</li> <li>• Understand the salient features of One – Act Plays.</li> <li>• Acquire proficiency in LSRW skills and communicate effectively.</li> </ul> |
| 15. | III- Core V     | Database Management Systems  | <ul style="list-style-type: none"> <li>• Enabling the students to understand the designing and implementation of a database for a given problem and to organize, maintain and retrieve information from a database efficiently and effectively.</li> </ul>                                   |
| 16. | III- Core VI    | Oracle Lab                   | <ul style="list-style-type: none"> <li>• Training in creating a data base and retrieving the required data from the data base.</li> </ul>  |
| 17. | III- Allied III | Discrete Mathematics         | <ul style="list-style-type: none"> <li>• Making the students to realize and find that there are multiple solutions to a given problem.</li> <li>• Applying logical reasoning to solve a variety of problems.</li> </ul>  |

**Program outcomes, program specific outcomes and course outcomes**

|                    |                           |                                |  |
|--------------------|---------------------------|--------------------------------|--|
| 18.                | IV- Non Major Elective II | Effective Employability Skills | <ul style="list-style-type: none"> <li>To train them in preparing the Curriculum Vitae and to face the interview.</li> </ul>   |
| 19.                | IV- Skill Based Subject I | Competitive Examination Skills | <ul style="list-style-type: none"> <li>To build a sense of awareness among students through proper guidance about various competitive examinations in order to motivate students for prospective career in government and corporate sector.</li> <li>To intensively guide students for competitive examinations like TNPSC, UPSC, SSC, RRB, IBPS etc.</li> </ul>   |

| <b>V SEMESTER</b> |                            |                                  |  |
| 28.               | III - Core XIII            | Corporate Accounting             | <ul style="list-style-type: none"> <li>Understanding the features of Shares and Debentures, internal reconstruction and exposure to the company final accounts.</li> </ul>   |
| 29.               | III - Core XIV             | Income Tax Law & Practice- I     | <ul style="list-style-type: none"> <li>Understanding the basic concept of Income Tax and to familiarize the different heads of income.</li> </ul>  |
| 30.               | III - Elective I           | Web Technologies                 | <ul style="list-style-type: none"> <li>Training the students to develop a webpage using java script and HTML.</li> </ul>   |
| 31.               | III - Elective II          | Cost Accounting                  | <ul style="list-style-type: none"> <li>Training them to identify material control, labour, overheads, process cost and prepare cost sheet.</li> </ul>  |

**Program outcomes, program specific outcomes and course outcomes**

|                    |                              |   |  |
|--------------------|------------------------------|---|--|
| 32.                | IV - Skill Based Subject III | Heritage and Tourism                    | <ul style="list-style-type: none"> <li>To understand the definitions, terminology and concepts of cultural heritage and its relationships with tourism.</li> <li>To understand heritage tourism supply by examining different categories of heritage attractions and the contexts within which heritage exists and additional perspectives on scale from the supply perspective.</li> <li>To understand the role of interpretation in cultural heritage sites and the relevance of such interpretation approaches to visitors.</li> <li>Provide a framework to plan, design, and assess interpretation programs for tourists.</li> </ul> |
| 33.                | IV - Skill Based Subject IV  | Marketing and Sales Management          | <ul style="list-style-type: none"> <li>To acquire analytical skills for solving marketing related problems and challenges and to familiar with the strategic marketing management process.</li> <li>To learn the elements of sales force to be an effective component of an organization's overall marketing strategy.</li> </ul>  |
| <b>VI SEMESTER</b> |                              |   |  |
| 34.                | III - Core XV                | Java Programming                        | <ul style="list-style-type: none"> <li>Training to develop Java programs.</li> </ul>   |
| 35.                | III - Core XVI               | Income Tax Law & Practice- II           | <ul style="list-style-type: none"> <li>To understand "set-off and carry forward of losses" and to determine the concept of assessment.</li> </ul>  |
| 36.                | III - Core XVII              | Special Accounts                        | <ul style="list-style-type: none"> <li>Creating awareness about accounts of banking and insurance companies.</li> </ul>  |
| 37.                | III - Core XVIII             | Management Accountancy                  | <ul style="list-style-type: none"> <li>Enabling them to understand fund flow, cash flow and ratio analysis.</li> </ul>   |
| 38.                | III - Elective III           | Dot Net Programming                     | <ul style="list-style-type: none"> <li>Understanding the basic knowledge of programming with Integrated Development Environment.</li> </ul>  |
| 39.                | IV - Skill Based Subject V   | Fruit and Vegetable Preservation Skills | <ul style="list-style-type: none"> <li>To understand the science, principles and techniques involved in fruits and vegetables preservation techniques.</li> <li>To impart thorough knowledge on the technical skills in various aspects of food processing and preservation.</li> </ul>  |
| 40.                | IV - Skill Based Subject VI  | Equipment Handling Skills For Events    | <ul style="list-style-type: none"> <li>To impart the characteristics of various types of electrical and electronic equipments used in events.</li> <li>To learn about the working, handling and troubleshooting skills on various electrical and electronic gadgets.</li> </ul>  |

## Certificate Course Specific Outcomes

- Delivers an assessment based on industry knowledge, independent from training courses or course providers.
- Grants a time-limited additional credential to all the students.
- To make them to know the recent topics beyond the curriculum.
- Introducing the online courses to help them to continue their future studies.
- Help them to enrich her knowledge in her subject of interest.
- Opportunities for students to enhance skills.

| SI No | Course Name                 | Course Outcomes  |
|-------|-----------------------------|--|
| 1.    | Payanpattu Naattuppuraviyal | <ul style="list-style-type: none"> <li>• சித்த மருத்துவத்தின் பயன்பாடுகளை அறிந்து கொள்ளுதல்.</li> </ul>  |
| 2.    | Idhazhiyal                  | <ul style="list-style-type: none"> <li>• பத்திரிக்கைத் துறையின் நுணுக்கங்களைக் கற்று கொள்ளுதல்.</li> <li>• இதழை உருவாக்க அறிந்து கொள்ளுதல்.</li> </ul>   |
| 3.    | Presentation Skills         | <ul style="list-style-type: none"> <li>• To develop English Vocabulary and Pronunciation Skills.</li> <li>• To develop Effective Presentation Skills.</li> </ul>   |
| 4.    | Communicative English       | <ul style="list-style-type: none"> <li>• To communicate effectively in English.</li> <li>• To enrich the employability skills and team-building ability.</li> </ul>  |
| 5.    | Logical Reasoning           | <ul style="list-style-type: none"> <li>• To enable the students to analyse arguments and to reach conclusion based on perceived patterns observed in specific events.</li> </ul>   |
| 6.    | Competitive Mathematics     | <ul style="list-style-type: none"> <li>• To enhance computation skills among students and increase strategic thinking and smart work.</li> </ul>   |
| 7.    | Optronics                   | <ul style="list-style-type: none"> <li>• Analyze the intensity variation of light due to Polarization, interference and diffraction.</li> <li>• Apply skill to find the wavelength of spectral lines using Plane diffraction grating.</li> <li>• Distinguish the methods of polarization by reflection, refraction and scattering.</li> <li>• Understand operation of semiconductor devices.</li> <li>• Understand number representation and conversion between different representations in digital electronic circuits.</li> <li>• Analyze logic processes and implement logical operations using combinational logic circuits.</li> </ul> |
